

Using the CUBES strategy, try answering the following 2 questions:

- 1) Mrs. Proulx went to the store to buy Halloween candy. She bought 13 boxes of candy. Mme Belanger also went to the store to buy candy. She bought 11 boxes of candy. How many boxes did Mrs. Proulx and Mme Belanger buy altogether?
- 2) Mrs. Gauthier found 9 pencils on the floor after school in her classroom. Mrs. Blais found 8 pencils on the floor in her classroom. How many pencils did Mrs. Gauthier and Mrs. Blais find altogether?
